

Website, Revamped

Unit 15: Web Development

Unit 41: Advanced Web & App Development Studies

By - Viduth Tennakoon

iAMDT1734

Acknowledgment

- I hereby would like to thank, AMDT and lectures for the resources and teaching the required skills and assisting me. My parents for providing me with necessary resources. My friends colleges for the support to make this project a success...

Content

1. Wireframes
2. Usability Principles (JAKOB NIELSEN'S USABILITY PRINCIPLES)
3. Final outcome of the web pages
4. User Acceptance Testing

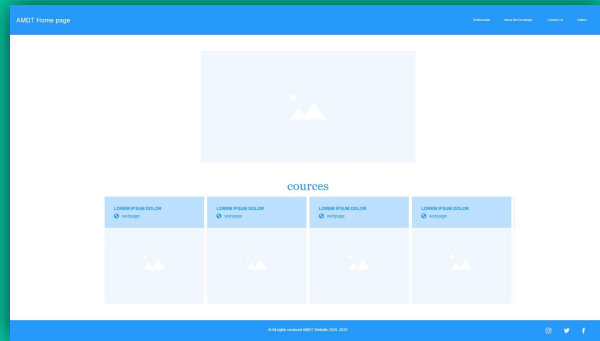

Little bit about the website

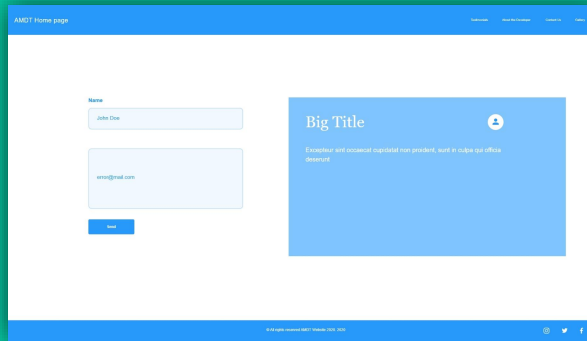

- I have used a light color theme on the website. (White, blue and Gray colors)
- A simple way of presenting the things needed to be seen on the site.
- Through out the site I have try to show its minimalist design.

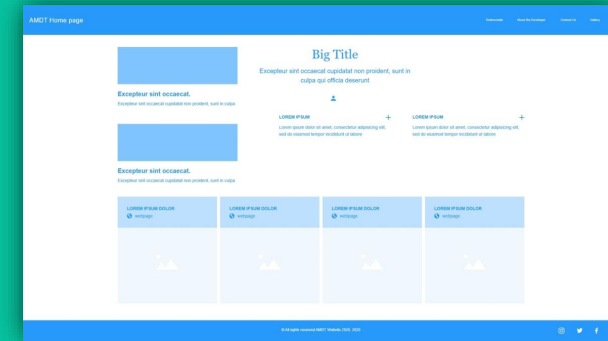

WIREFRAMES

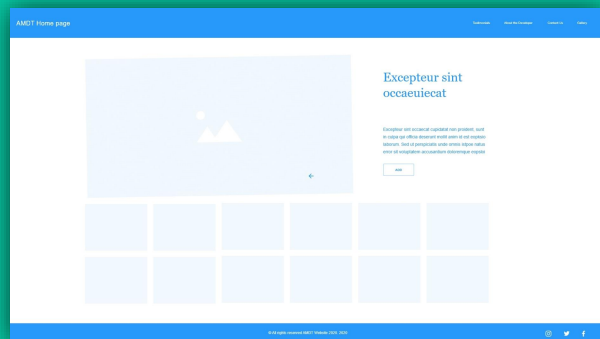

1st page

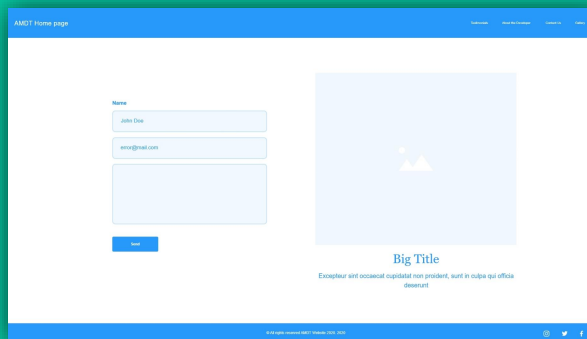

2nd page

3rd page

4th page

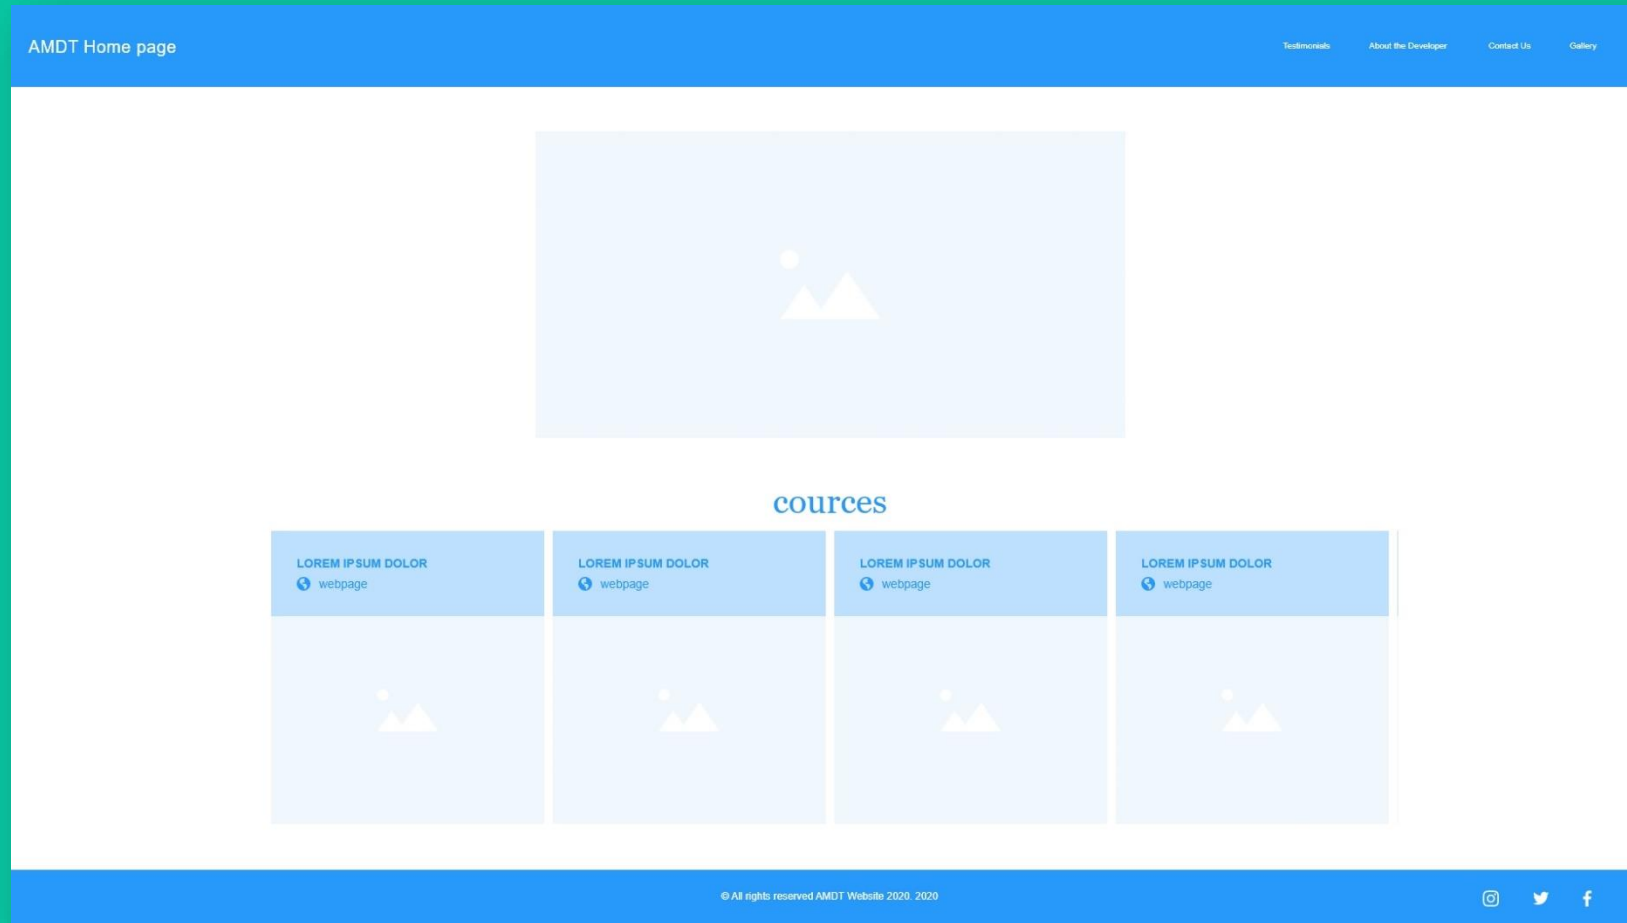

5th page

3rd page mobile view

Home page (landing page)

I will make a simple home page to show the minimalist design on it .

Homepage includes the set of courses and extra details on the campus plus upcoming events list

2nd page which is testimonials, its also a simple page that you can give your thoughts by typing In the boxes and it will be displayed on the right side box as a list with time u set it.

About the developer

3rd page is about myself and my work.

I will use my pics and videos on image boxes and descriptions to get a nice looking portfolio.

This page is also responsive on mobile devices for that I will use CSS Media queries

Instagram Twitter Facebook

4th page is contact us page which any person can contact the amdt through a email

I will use txt boxes and buttons. And will keep this page as simple as it is.

Gallery

Final page will be gallery, I'm going to ass some of the best pictures captured from the college and add here in a nice manner and will be able to check on the albums that I will hyper link them to the amdt official website

Usability Principles that I have used from “JAKOB NIELSEN’S USABILITY PRINCIPLES”

Visibility of system status

The Website always keeps users informed about what is going on through feedbacks within short time.

The visibility of system status alludes to how well the condition of the system is passed on to its clients. Preferably, systems ought to consistently keep clients educated about what is happening, through fitting criticism inside sensible time.

User control and freedom

Clients often pick system works accidentally and will require an unmistakably checked "crisis exit" to leave the undesirable state without experiencing an all-encompassing exchange. Backing fix and re-try.

If ever come up with a problem clicking on AMDT logo on navigation bar will put you back to the homepage.

Aesthetic and minimalist design

Exchanges ought not contain data which is unessential or once in a while required. Each additional unit of data in an exchange rivals the important units of data and decreases their relative visibility.

Match between system and the real world

The system ought to communicate in the clients' language, with words, expressions and ideas natural to the client, instead of system-situated terms. Follow genuine shows, causing data to show up in a characteristic and consistent request.

Recognition rather than recall

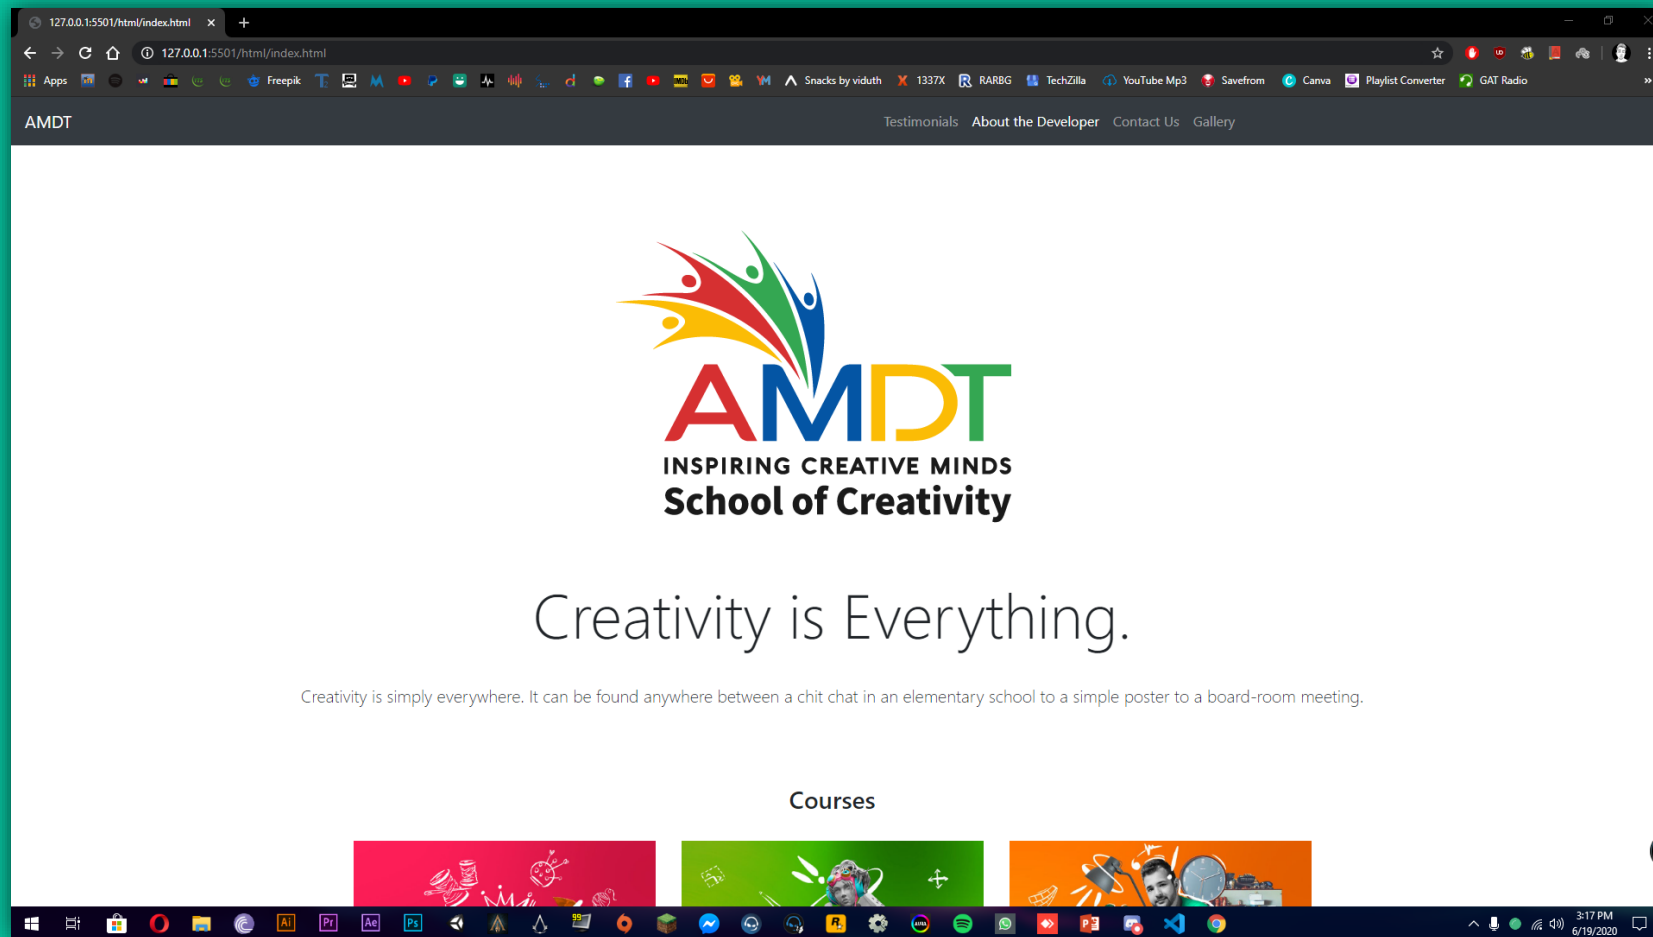

Limit the client's memory load by making items, activities, and choices noticeable. The client ought not need to recollect data starting with one piece of the discourse then onto the next. Guidelines for utilization of the system ought to be noticeable or effectively retrievable at whatever point suitable.

Final outcome of the web pages

Home page (landing page)

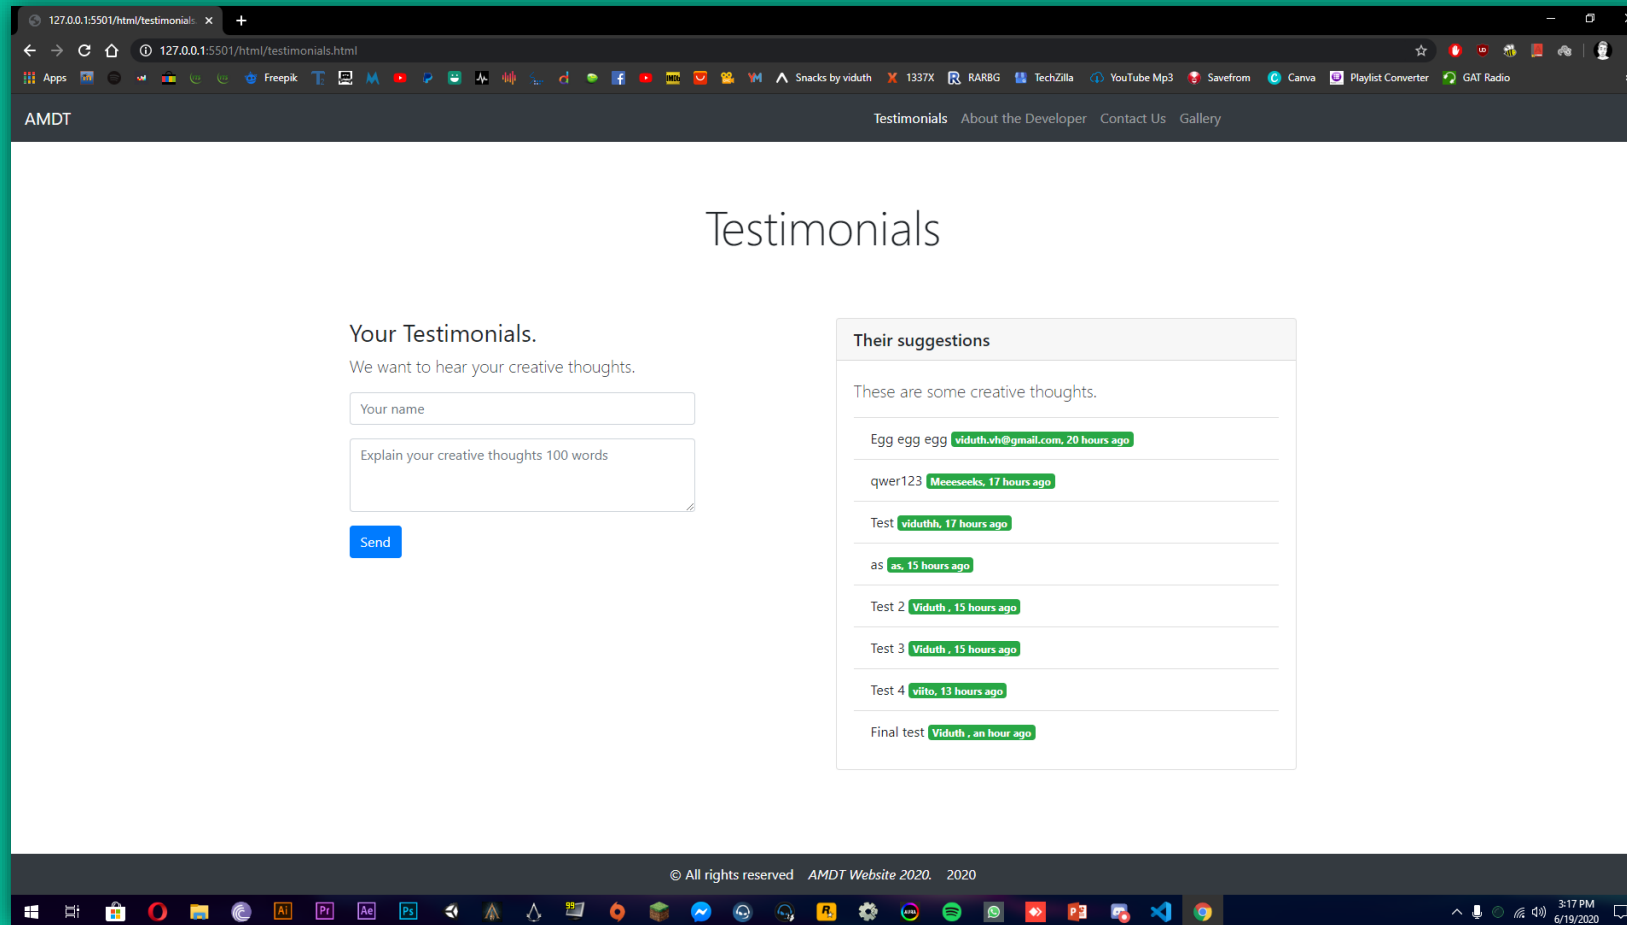

This is my landing page. I have add the coerces and relevant posts with some details to show a clean page to the viewer at the 1st page

I have used hover effects on coerces to give a better feel.

Testimonials

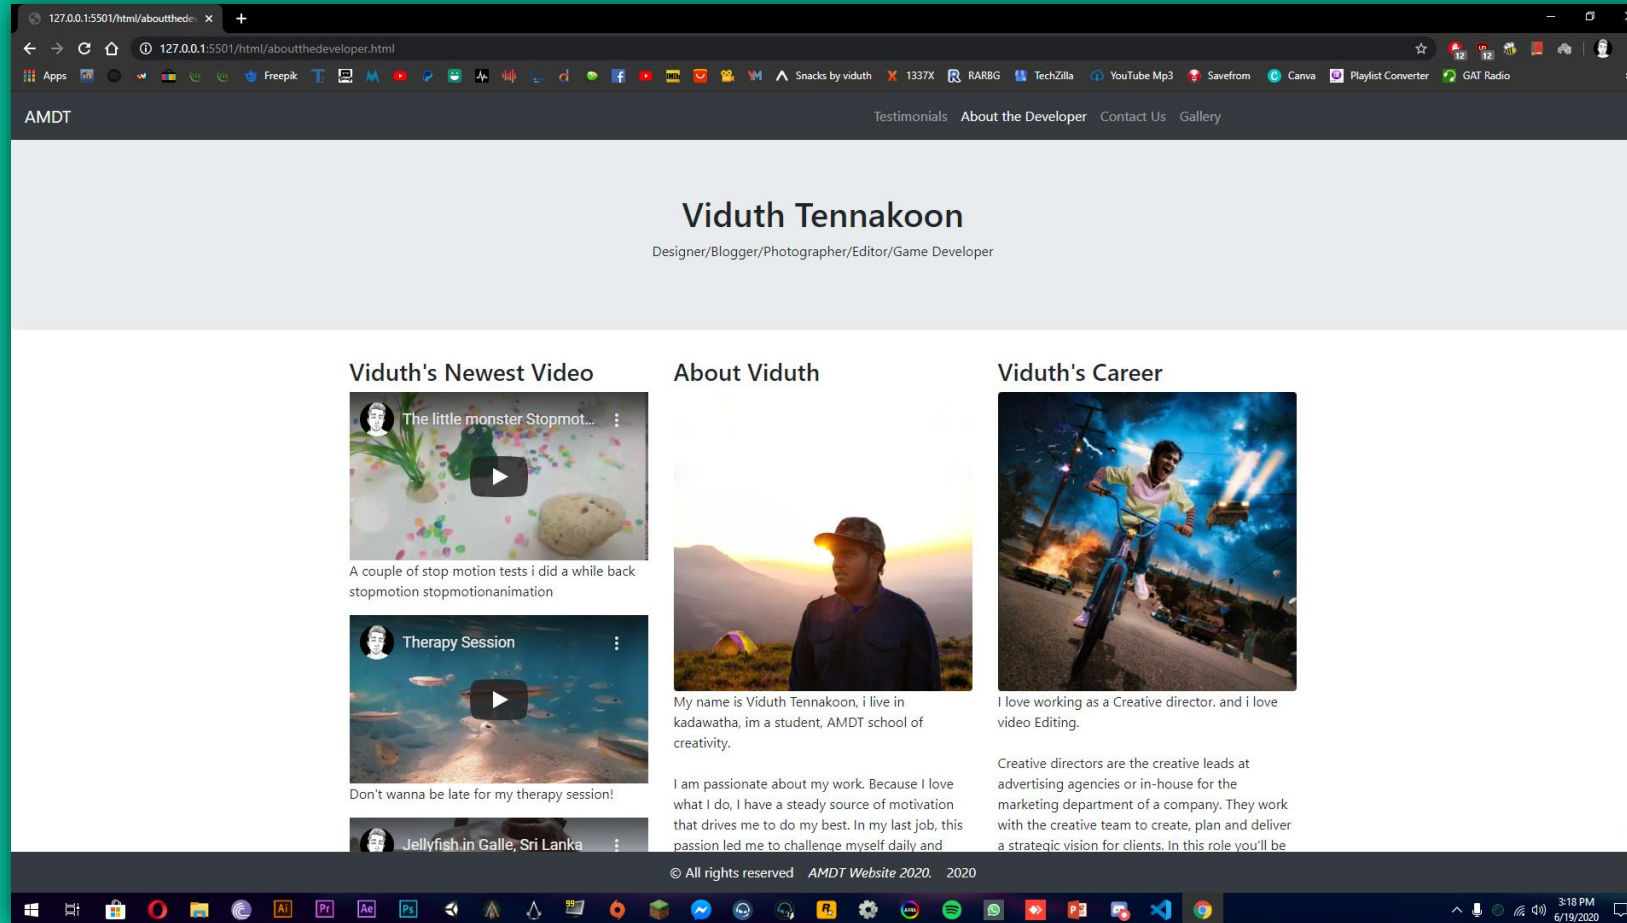

This is my testimonial page. I kept it simple so anyone can add there suggestions and see it on the right side box

To this I have used database with MongoDB.

So it displays the details with time and relevant message

About the developer

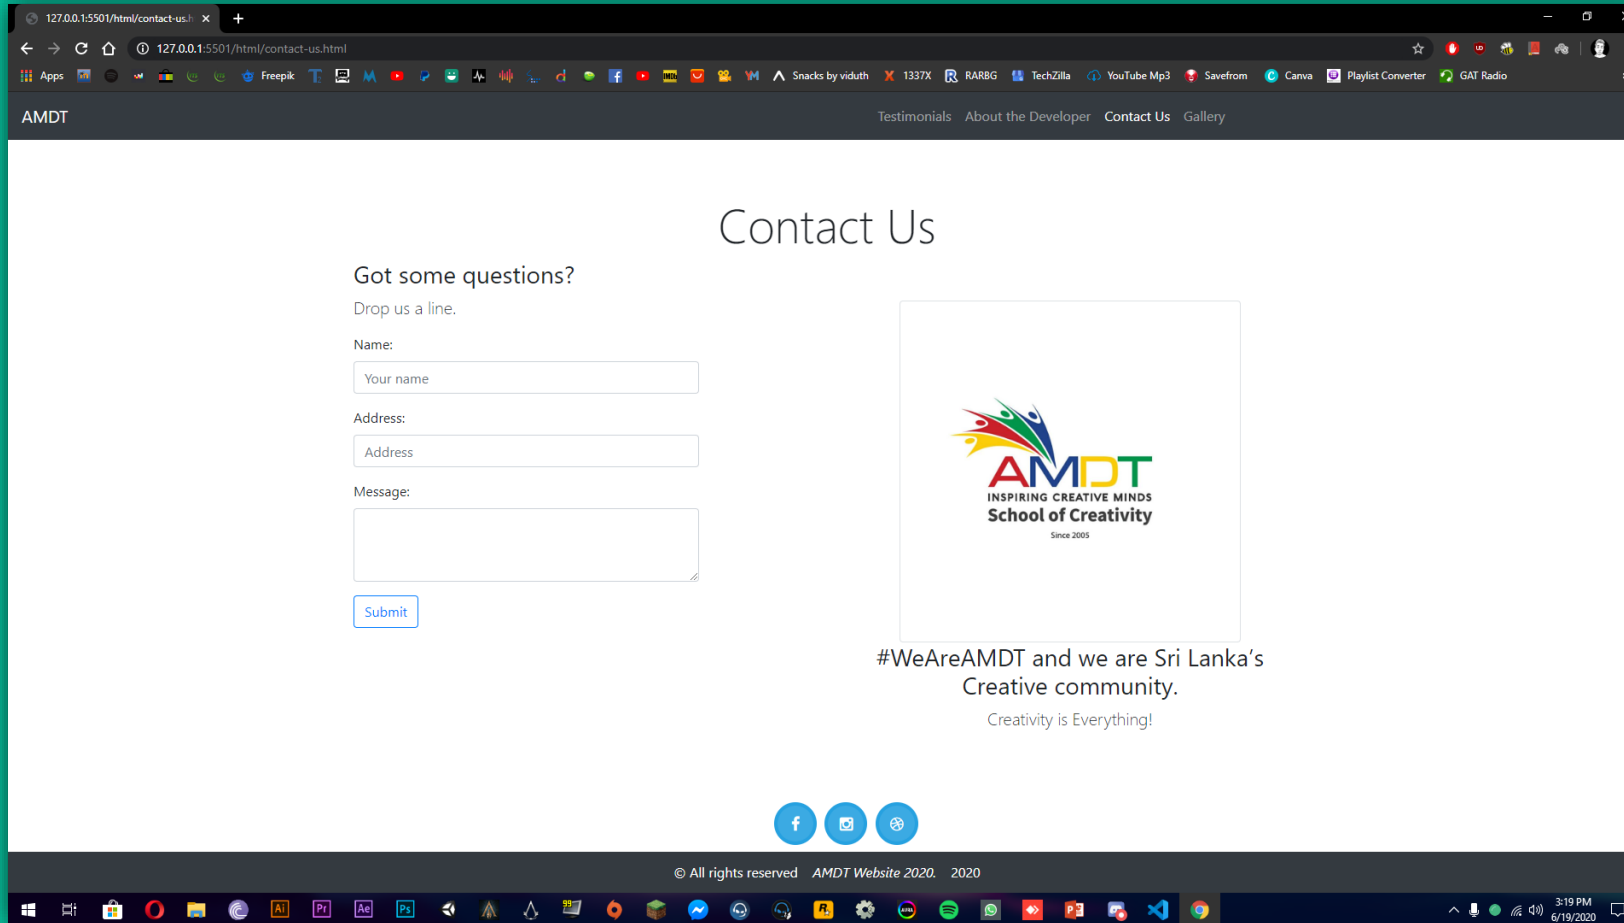

This is my portfolio page that I included my details plus work I've done, videos I created.

I used html and css to make a nice page to the about the developer

Contact us

The screenshot shows a web browser window displaying the AMDT Contact Us page. The browser's address bar shows the URL `127.0.0.1:5501/html/contact-us.html`. The page has a dark header with the AMDT logo and navigation links: Testimonials, About the Developer, Contact Us, and Gallery. The main content area is white and features the title "Contact Us" in a large, dark font. Below the title, there is a form with the heading "Got some questions?" and the prompt "Drop us a line." The form includes three input fields: "Name:" with a placeholder "Your name", "Address:" with a placeholder "Address", and "Message:" with a larger text area. A "Submit" button is located below the message field. To the right of the form is a square box containing the AMDT logo, which consists of a colorful graphic of three stylized figures holding hands, with the text "AMDT INSPIRING CREATIVE MINDS School of Creativity Since 2005" below it. Below the logo box, there is a paragraph of text: "#WeAreAMDT and we are Sri Lanka's Creative community. Creativity is Everything!". At the bottom of the page, there are three circular social media icons for Facebook, Instagram, and Twitter. The footer of the page contains the text "© All rights reserved AMDT Website 2020. 2020". The browser's taskbar at the bottom shows various application icons and the system clock indicating 3:19 PM on 6/19/2020.

Creativity is Everything!

© All rights reserved AMDT Website 2020. 2020

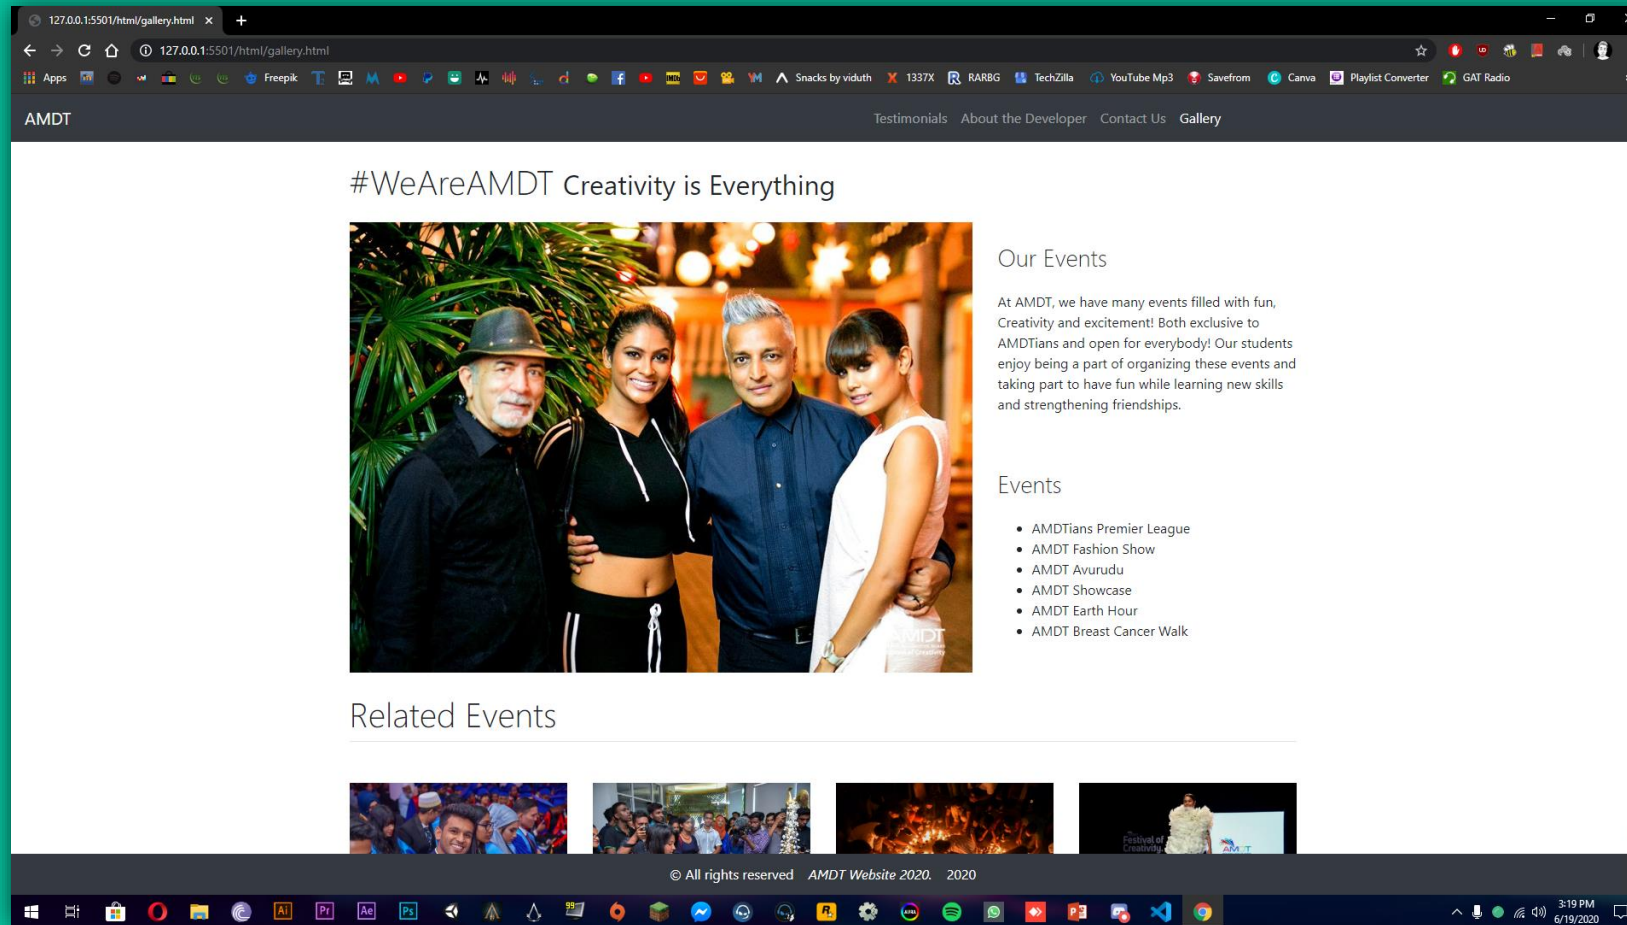

This is my contact us page. This also I kept simple to make the viewer feel the minimalism.

I have used mailer.js to send email on the contact us page

So anyone can contact Amdt through their email, and that email will be send to our email.

Gallery

This is my last page I have used a extra page as the gallery I have included some of the albums and events in Amdt and linked them in to the official website albums.

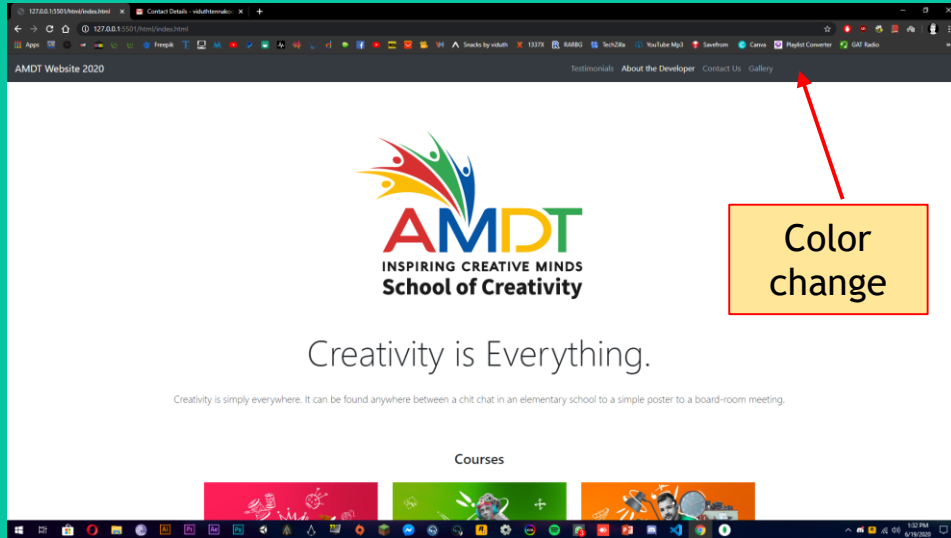

Also I used the upcoming event with hover styles to this page.

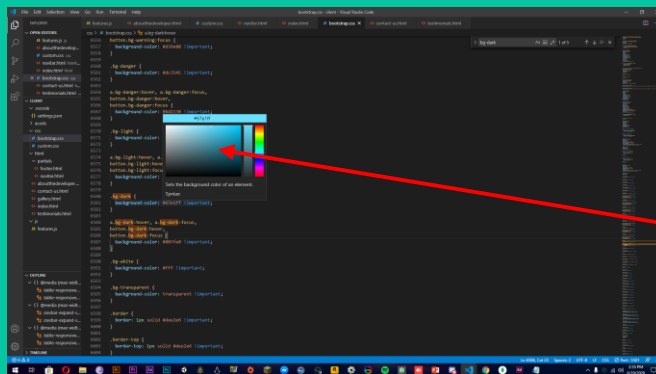

User Acceptance Testing

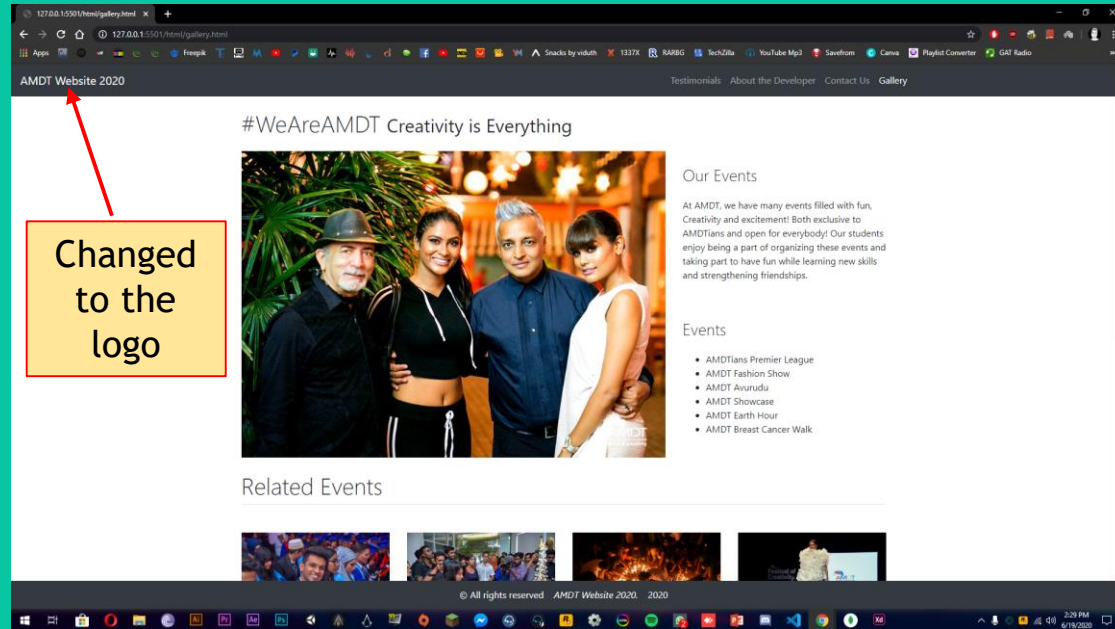

User acceptance testing that I did

- My cousin said that the Navigation bar is too dark so I had to change it to a light blue color because it looked good on it.

User acceptance testing that I did

- Home button was as a text “Amdt Website 2020” I had to changed it in to the Amdt logo instead because it looked more professional.
